# DIAGNOSTIC TESTING

## SERUM ALLERGY TESTING & HYPOSENSITIZATION

### VETERINARIANS

## Spectrum becSCREEN

becSCREEN™ is a biofilm susceptibility test which allows Veterinarians with the help of Spectrum Labs, to determine whether the tested clinical isolate from a chronic relapsing infection will be susceptible or resistant to a given antibiotic in the biofilm state, which exists in the body.

### A - Spot Test

- Canine/Feline SPOT Test - 580-0092
- Equine SPOT Test - 580-0086

Injectable Treatment Sets and Maintenance/Refill vials

- Single Initial Set - 580-9200
- Double Initial Set - 580-9202
- Single Maintenance Set - 580-9201
- Double Maintenance Set - 580-9203

Sublingual Treatment Sets

- Single Treatment Set - 580-9204
- Double Treatment Set - 580-9205

## Spectrum RESPIT

Respit is only for those veterinary clients who cannot afford Spectrum's traditional allergy testing and Hyposensitization treatment. Developed by a board-certified veterinary dermatologist as the "no-test" immunotherapy alternative for pets. Instead of relying on allergy testing, Respit is formulated to include the most significant allergens in each geographic region. Hyposensitization is the only treatment for atopic dermatitis that can change the course of the disease. Available in Injectable and Oromucosal Spray formulations.

**Description**

Allerpet Single Solution for Cats, Dogs & Birds - 473 ml

Now.... A single, reformulated, more effective allerpet solution that may be safely used on cats, dogs, kittens, puppies, small furry pets and birds to remove their pet-related allergens.

Allerpet cleans the hair of dander, saliva, sebaceous gland secretions and urine residue. These allergens are the prime causes of allergic reactions to pets.

### XXTERRA

An herbal formulation of bloodroot powder and zinc chloride solution, combined and stirred into a smooth brown paste. Bloodroot contains sanguinarine (the primary component), chelarathrine and protopine, all of which are alkaloids. Zinc chloride promotes inflammation of the sarcoids surface and with the alkaloids, alters the sarcoid cells so they become antigenic to the host. Accordingly, XXTERRA™ alters the antigenicity of a sarcoid to stimulate the host's immune system and result in an immune rejection reaction of the sarcoid.

**Zn 4.5 Otic 60 mL,**  
180-4500

### Zn7 Derm - INDICATIONS

1. A broad spectrum of dermatology cases where you need to reduce your steroid and/or antibiotic demand by using a natural anti-pruritic, skin care topical.
2. Dermatology cases that are slow to respond with hair re-growth.
3. Post-surgery cases where a topical is beneficial to reduce the surgery site irritation, itch, and infection.

**Maxi/Guard<sup>®</sup> Zn7<sup>™</sup> Derm** - The industry's most recognized neutralized zinc based skin care topical. This counter-irritant provides soothing relief from itching and drying of raw skin conditions  
Great for Hot Spots, allergy rashes and irritations, etc. - instantly stops itching and promotes healing

### Zn 4.5 Otic

Delivers the essential micronutrient zinc, complexed with select amino acids and the proven malassezia agent, boric acid. Active ingredients are delivered in a well tolerated propylene glycol vehicle at a pH of 4.5.
